### Condition Report

Overall the print is in very good condition. There are no fox marks, tears or scuffs to the print.

The print is affixed at the top margin with tape (see photo below). This does not appear to be of conservation standard.

The colours are fresh and strong, although there appears a degree of discolouration due to the mount (again, see photo below).

The print bears the FATG stamp to the lower left margin (detail in the photo).

I would highly recommend reframing the print, as the frame is old, worn and not of conservation standard.
